CE Self-Instruction Test—November 2009

1 **Earn 1 Credit Hour** for successful completion of this month's test *(November 2009)*. This is a self-instructional program. CR Foundation is an ADA CERP recognized provider and an AGD approved PACE program provider.

2 **Complete the Test.**

CE Self-Instruction Test—November 2009 *Check the box next to the most correct answer*

1. Thoroughly washing tooth preparations:
   - ❒ A. Removes most of the microorganisms
   - ❒ B. Is not necessary
   - ❒ C. Does not remove the microorganisms
   - ❒ D. None of the above
2. The following ingredients have been proven to disinfect tooth preparations:
   - ❒ A. 2% glutaraldehyde and 40% HEMA
   - ❒ B. 4% glutaraldehyde and 35% HEMA
   - ❒ C. 5% glutaraldehyde and 35% HEMA
   - ❒ D. Any concentration of glutaraldehyde and 35% HEMA
3. Glutaraldehyde and HEMA is applied:
   - ❒ A. Before acid-etch, washing, and drying
   - ❒ B. After the acid-etch, washing, and drying
   - ❒ C. Mixed with the acid-etch
   - ❒ D. Before resin-modified glass ionomer
4. Glutaraldehyde and HEMA are suggested to be applied to:
   - ❒ A. Intracoronal tooth preparations
   - ❒ B. Crown preparations
   - ❒ C. Teeth that have been cleaned, air slurry polished, and acid-etched
   - ❒ D. All of the above
5. Which of the following is ***not*** true for self-adhesive resin cements?
   - ❒ A. All cements are available in multiple colors for esthetic matching of restorations
   - ❒ B. All cements undergo self-cure, but differ in the length of time required to fully polymerize
   - ❒ C. All cements exhibited a film thickness of less than 40µm
   - ❒ D. Radiopacity varied from about half to nearly double the radiopacity of enamel
6. Which of the following is ***not*** an advantage of self-adhesive resin cements?
   - ❒ A. Minimal post-operative tooth sensitivity
   - ❒ B. No etching or pre-treatment of teeth
   - ❒ C. Low bond strength
   - ❒ D. Simple, one-step procedure
7. According to the CR Evaluator Survey Results, self-adhesive resin cements:
   - ❒ A. Are the most used cement for daily routine cementation of crowns and fixed partial dentures
   - ❒ B. Are used primarily for post cementation
   - ❒ C. Are very cost effective
   - ❒ D. Have an extremely low failure rate
8. Clinical tips for using self-adhesive resin cements include:
   - ❒ A. Avoid refrigeration to extend shelf-life and maintain chemical properties
   - ❒ B. Allow the self-cure to complete before spot curing the margins
   - ❒ C. Rely completely on the shade of the cement to improve the esthetic outcome
   - ❒ D. Roughen the inner surface of the canal with a diamond instrument prior to post cementation
9. Septoject XL anesthetic needles are unique because of which of the following features?
   - ❒ A. 27-gauge outer diameter
   - ❒ B. 14% larger inner lumen
   - ❒ C. Sharp, siliconized triple-bevel tip
   - ❒ D. Both b and c
10. Quad-Tray Xtreme has improved design of:
   - ❒ A. New plastic construction
   - ❒ B. Occlusal mesh attached at the distal bar
   - ❒ C. Wider arch
   - ❒ D. Both b and c
